PO3. To enhance programming skills of the young IT professionals, the program has introduced the concept of project development in language/technology learnt during semesters.

PGDCA

Programme Outcomes:

PO1. It will equip the students with skills required for designing, developing applications in Information Technology.

PO2.Students will be able to learn the latest trends in various subjects of computers & information technology.

PO3.To provide a detailed coverage of the key concepts and challenges in data and resource protection and computer software security.

PO4. To give hands on to students while developing real life IT applications as part of the study.

Msc.IT/ Msc.IT (LE)

Programme Outcomes:

PO1. Build up programming, analytical and logical thinking abilities.

PO2.Get prepared for placement by inculcating technical and professional skills.

PO3.Design and develop computer programs/computer-based systems in the areas related to algorithms, networking, web design, Artificial Intelligence, Machine Learning.

PO4. Provides technology-oriented students with the knowledge and ability to develop creative solutions.

B.SC(NM/M/NMCA)

Programme Outcomes:

PO 1 : This stream's students are capable of doing bioinformatics and computer-assisted research.

PO 2 : Students know about numerous bimolecular processes at cellular level that are involved in the development of various technologies in this course.

MSc.CHEMISTRY

Programme Outcomes:

PO 1 : Students will be able to apply their knowledge to build up small scale industry for developing endogenous products.

PO 2 : Students will be able to implement various aspects of chemistry in natural products isolation, pharmaceuticals, dyes, polymers, petroleum products etc.

PO3: Students have sense of responsibility towards environment problems and apply their knowledge to solve the various environment related problems.

MSc. Mathematics

Programme Outcomes:

PO 1 : students will be able to find out or analysing scientific reasoning for various things.

PO 2 : Students will get knowledge about both pure and applied mathematics branches.

PO 2 : Students will get knowledge about both pure and applied mathematics branches.

B.A.

Program Outcomes:

PO1 : the individual must demonstrate maturity, professionalism and team working skills.

PO2 : the students will have general idea of operations in business.

PO3 : the individual will have specialized skills to deal with area specific issues of concern.

PO4 : the individual will be able to apply technological knowhow for business advancements.

PO5 : the individual will be capable of analyzing, investigating and solving critical business issues.

M.A. Education

Some of the expected programme outcomes of M.A Education programme may include the following:

1. Demonstrate understanding of an academic field of study and its paradigm, current educational development and contemporary issues in education.
2. Use knowledge, understanding and skills required for identifying problems and issues, collection of relevant quantitative and/or qualitative data from drawing from different sources, and apply appropriate research methodology and participate in generating new knowledge.
3. Connect and establish linkages with other subjects. Meet own learning needs by accessing to educational resources both online and offline.
4. Apply knowledge and skills to new contexts and engage with individuals, institutions and society.

M.A. PUNJABI

Course outcomes

1. Students can be able to understand communicative Punjabi, write accurately and speak fluently .

2.Their strength in the Punjabi language will help them to actively participate in the debates and discussions.

3.It is simulation most importantly in their every professions after completing the study program successfully.

B.A.B.Ed.

Programme Outcomes:

After completion of Teacher Education programme, the pupil teachers will be able to:

- Develop ten key competencies as identified by the National Council of Teacher Education (NCTE).
- They attain a harmonious development of their personality.
- Analyse the curriculum and select appropriate teaching strategies according to their needs.
- Compete at the global level through the use of interdisciplinary knowledge.
- Engage themselves in the process of self-directed learning through the use of innovative practices.
- Apply teaching skills and methodology to deal with classroom problems.
- They empower themselves with the subject content and pedagogy.
- Expand their horizons of knowledge by integrating technology into the process of planning and transaction of curriculum.
- Understand the characteristics, needs, and strategies for dealing with diverse learners in an inclusive environment.
- Develop various life skills needed for successful survival in today's society.
- Contribute to the community service programme.
- Seek better employment and generate resources for the economy.
- Become reflective learners with an insight into human welfare.
- Show their concerns about the emerging issues in the current environment.
- Establish a link between theory and practice.
